Where, as a result of the accident, is the permanent partial disability found within one year from the date of the incident, which makes the insured objectively partially disable of any work or employment for lifetime, the Company will pay as appropriate - as specified in the table below - percentage of the amount of permanent total disability in the policy.

Οι περιπτώσεις Μόνιμης Μερικής Ανικανότητας είναι περιοριστικά οι ακόλουθες:

The cases of Permanent Partial Disability are limited the following:

TABLE OF DISABILITY PERSENTAGE

CASE OF PERMANENT PARTIAL DISABILITY	RIGHT	LEFT
Total loss of one of the upper limbs	70%	60%
Total loss of the arm or forearms	60%	50%
Total loss of thumb	18%	16%
Total loss of the index finger of the hand	14%	12%
Total loss of middle finger or ring finger of the hand	8%	8%
Total loss of the small finger of the hand	8%	8%
One of the lower limbs: above the knee	60%	60%

The leg	40%	40%
The big toe of the foot	5%	5%
Any other toe of the foot	3%	3%

Total deafness of one ear	10%	10%
Total deafness of both ears	40%	40%

In case the insured is left-handed, the percentages for the various right and left hand disabilities are reversed.

It is understood that an accident gives right for a single indemnity for death or permanent disability. If the insured dies within one year from the date of the accident and has already been indemnified for permanent disability, the Company will pay to the beneficiaries the difference between the already paid indemnity and the sum provided in the case death. The total and permanent loss of functional use of an organ or body member is considered as an anatomical loss of organ or member, and in the event of partial loss of functional use, the above percentages are reduced depending on the lost functionality.

In the case of anatomical or functional loss of several organs or members of the body, the sum of indemnity is calculated by adding the percentages corresponding to each damage up to a maximum liability limit of 100%.

Permanent disability of each phalanx end of the fingers, with the exception of the thumb, is considered to be only its total removal.

The indemnity sum for functional or anatomical loss of a phalanx of the thumb or big toe, is half the percentage determined for the total loss of these fingers, while for the same loss of another finger, the indemnity sum is one third of the corresponding percentage.

In the case of total disability which is not specified in the above table, the indemnity sum is determined by calculating, in relation to the rates of cases set out, the degree to which the general

ability of the insured to exercise any lucrative work, irrespective of his profession, has been reduced.

In case of anatomical loss or reduction of functional use of an organ or body member that was defective, the above percentages are reduced by the degree of the previously existing disability. If the insured suffers from total and incurable paralysis or incurable insanity due accident, the Company assimilates these cases with 100% permanent disability and pays the sum indicated in the coverage table.

C. MEDICAL EXPENSES FROM ACCIDENT

The Company pays the insured during the period of cover the total of the accredited medical expenses for the first accident, which occurred within one year from the date of the accident and up to an annual amount of three hundred euros (€ 300.00)

The Amicable Settlement Agreement applies the Direct Payment System (DPS) in the event of a motor vehicle accident, provided that both insurance companies involved are participating in the amicable settlement system. Implementation conditions
